DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:
With respect to the independent claim 1, the prior art fails to disclose or make obvious an apparatus for generating EUV radiation comprising a plurality of source modules uniformly distributed around an optical axis, a reflector that is rotatable around the optical axis to successively direct radiation from the sources in the direction of the optical axis successively with respect to time, and a synchronization device provided as recited in claim 1.

Claims 2-16 are allowed by virtue of their dependency on claim 1.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Relevant Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following are cited to show further show the state of the art with respect to EUV source multiplexing:

USPN 6396068 to Sweatt et al. switches between two EUV sources.

US 2003/0223544 by Murakami. combines time multiplexes illumination from multiple EUV sources using a tilting mirror.

US 2004/0129895 by Goldstein et al. simultaneously combines illumination from multiple EUV sources.
